# Data Processing Addendum Terms

*Enterprise Policy Document*

<b>Document ID</b>	DPA-001
<b>Version</b>	v1.0
<b>Effective Date</b>	June 2026
<b>Document Owner</b>	Senior Leadership / Legal / Engineering Leadership
<b>Applies To</b>	Enterprise customer agreements, embedded integrations, and data processing terms

## Purpose

---

These Data Processing Addendum Terms are intended as a reusable template for enterprise embedded integrations. They summarize Styldod's standard enterprise data processing position. The signed commercial agreement, Data Processing Agreement, Statement of Work, or customer-specific terms control where applicable.

## Processing Role and Instructions

---

For enterprise embedded integrations, the customer generally acts as controller and Styldod generally acts as processor with respect to personal data processed on behalf of the customer, unless otherwise agreed in writing. Styldod processes customer personal data only on documented instructions from the customer, including the agreement, Statement of Work, technical documentation, or written instructions.

## Scope and Data Categories

---

Styldod processes customer data only as necessary to provide, operate, support, monitor, secure, and improve the agreed enterprise embedded service, and not for unrelated purposes. Data processed may include:

- Property/listing images, room photos, and exterior images selected by the user.
- User design inputs, text prompts, dropdown selections, and optional reference images.
- Generated outputs from the redesign or visualization workflow.
- Limited location data (postal/zip code) where enabled for product discovery.
- Workflow, job, and session metadata.
- Technical logs for monitoring, support, security, and service reliability.

Unless specifically agreed, Styldod does not require user name, email address, phone number, payment data, government ID, customer platform credentials, or other direct end-user identifiers.

## Special Category Data

---

Styldod does not require or intentionally collect special category personal data. If such data is incidentally included in customer-provided content, Styldod processes it only as part of the agreed workflow and does not use it to identify individuals, infer sensitive characteristics, or make decisions about individuals.

## Confidentiality and Security

---

- Styldod ensures that personnel authorized to process customer data are subject to confidentiality obligations.
- Styldod maintains technical and organizational measures to protect customer data, including access control, least privilege, encryption in transit (HTTPS/TLS), encryption at rest where

supported by cloud infrastructure, production access restrictions, logging, monitoring, and incident response processes.

## Subprocessors and Transfers

---

- Styldod does not outsource core service delivery or development work to external subcontractors unless disclosed or agreed. Core development is handled by Styldod and authorized personnel within Stylstage India Private Limited, its wholly owned subsidiary.
- Styldod may use third-party infrastructure providers required to host, store, transmit, secure, monitor, or support the service (primarily AWS and MongoDB Atlas).
- Where customer personal data is transferred outside the EEA, UK, Switzerland, or other applicable region, Styldod uses appropriate contractual safeguards where required, including Standard Contractual Clauses (SCCs) or equivalent mechanisms.

## Assistance, Deletion, and Incident Notification

---

- Styldod reasonably assists the customer in responding to data subject rights requests where relevant data is under Styldod control and the customer provides sufficient information to locate it.
- Upon termination or expiry of the applicable agreement, Styldod deletes or returns customer personal data under its control, unless retention is required by law, security, backup, dispute, or contractual obligations.
- Styldod notifies the customer without undue delay after becoming aware of a confirmed personal data breach affecting customer personal data, in accordance with the applicable agreement and legal requirements.

## Use Restrictions

---

- Styldod does not use customer personal data for direct marketing unless expressly agreed in writing.
- Styldod does not use customer personal data or customer production data to train unrelated public AI models unless expressly agreed in writing.
- Styldod embedded integrations do not perform automated decision-making that produces legal or similarly significant effects on individuals.
